

Children in the Asylum System

June 2022

The asylum statistics are published quarterly by the Home Office.

Unaccompanied Children Applications

The number of asylum applications by unaccompanied children is shown in the tables below. From 2010 to 2013 there was a downward trend in the number of applications. Unaccompanied children accounted for just under 8% of all asylum applications in 2021 compared with over 16% in 2008.

Table 1: Asylum applications by Unaccompanied Children (excl. Dependants)

	2017	2018	2019	2020	2021
Applications	2,399	3,063	3,775	2,773	3,762
% change to previous year	-27%	+28%	+23%	-27%	+36%

Table 2: Asylum applications by Unaccompanied Children by quarter (excl. Dependants)

	Q1	Q2	Q3	Q4
2022	835			
2021	516	715	1,235	1,296
2020	786	462	888	637
2019	1,008	780	921	1,066
2018	667	604	851	941

In 2021 there were increases in numbers of applicants for all the countries in the top 7 countries of origin except for Sudan and Eritrea.

Apart from these 7 countries there were no other countries with more than 100 applicants in 2021.

Table 3: Top 8 child asylum applicant producing countries (excl. Dependants)

	2017	2018	2019	2020	2021
Iran	233	269	545	352	1,022
Afghanistan	227	223	437	457	547
Sudan	356	496	457	470	383
Eritrea	355	684	597	356	354
Iraq	271	332	459	212	350
Syria	39	39	53	98	279
Albania	265	293	238	105	115

In 2021 94% of applicants were male, which is slightly higher than earlier years.

Unaccompanied Children: ages

In 2021 the age distribution was:	Aged 16 and over	78%
	Aged 14 – 15	27%
	Aged under 14	3%

There are also a small number of cases which are recorded as 'age unknown'. The 'age unknown' category is **not** related to age disputed cases.

The number of **age disputed** cases raised is shown in the table below. These are cases where an applicant claims to be a child but the Home Office assessment of appearance, or occasionally other evidence, leads to a dispute of the claim to be a child. There was a very large increase in the number of age disputed cases in 2021.

Table 4: Age Disputed Asylum applications (excl. Dependants)

	2017	2018	2019	2020	2021
Applications	716	875	798	853	2,517
% change to previous year	-23%	+22%	-9%	+7%	+195%

During 2021 the countries of origin with the largest numbers of age disputed cases raised were:

Iran	902
Afghanistan	391
Iraq	253
Sudan	224
Eritrea	197
Vietnam	161
Syria	158

These countries accounted for 91% of age disputed cases raised.

The Home Office statistics on age disputed cases do not include the category of those applicants who claim to be children but who are treated as adult, according to Home office policy. This used to state that in the opinion of an Immigration Officer "their physical appearance and/or general demeanour **very strongly** indicates that they are **significantly** over 18 years and no other credible evidence exists to the contrary" but the wording has changed since June 2019 to "very strongly suggests that they are 25 years or over"¹.

Unaccompanied Children Decisions

- Of the decisions made on unaccompanied children's claims in in 2021, 91% were refugee status, where the decision was made whilst the child was under 18.
- For decisions on unaccompanied children who have reached the age of 18 the refusal rate dropped in 2017 to 45%, rose to 60% in 2018, but by 2021 had fallen to 13%.
- Unaccompanied children who have reached the age of 18 when a decision is made have in the past generally been more likely to have their asylum claim refused.

¹ This policy has now reverted back to the pre-June 2019 wording but the 'over 25' wording was in place during 2021.

- There are fewer outright refusals for children under the age of 18 because a child who cannot be returned to their country of origin is granted a specific form of leave called UASC leave.

Decisions by country of origin

The tables below show decisions by country of origin for 2021. The tables include those countries of origin where 50 or more decisions were made during the year.

A high proportion of decisions to grant refugee status can be seen for several countries.

Albania was the country with the highest refusal rate.

Albania	83	27	3	0	0	1	52

As can be seen there are significant differences between these countries of origin.

Calais

Following the closure of the camps in Calais there was an operation to transfer children to the UK. Between 1st October 2016 and 15th July 2017 a total of 769 children were transferred to the UK from Calais. There were 227 children from Afghanistan, 211 from Sudan, 208 from Eritrea and 89 from Ethiopia. There were fewer than 10 children from any other country.

Section 67 ('Dubs') children

Section 67 of the Immigration Act 2016 placed a duty on the Home Office to transfer a specified number of unaccompanied children to the UK from elsewhere in Europe. After consultation with local authorities this number was set at 480. These children have all been transferred to the UK. More than 400 of these children were from four countries of origin: Eritrea, Afghanistan, Sudan and Ethiopia. The majority were transferred from France.

Dependent Children

The annual statistics include figures for the number of asylum applicants who are dependants rather than having an application in their own name. The majority of dependants are children. The table below shows the breakdown of dependants by age. Since 2018 the data only shows the total number under 18, which was 6,698, with 2,281 over 18 in 2018. It was 7,211, with 2,589 over 18 in 2019. 5,338, with 1,833 over 18 in 2020 and 5,562 with 2,393 over 18 in 2021.

National Transfer Scheme

This scheme has operated since July 2016. The intention is to share the responsibility for looking after unaccompanied children between local councils. It allows a council which has more than a defined proportion of unaccompanied children to refer new arrivals to another region or council.

The table below shows transfers out of and into each region.

About the Refugee Council

The Refugee Council is one of the leading organisations in the UK working with asylum seekers and refugees. We give help and support to asylum seekers and refugees, and also work with them to ensure their needs and concerns are addressed by decision-makers.
